Subject: Bayou Corne Update
Date: 01/15/2013 12:36 PM

The monitoring activities at Bayou Corne are scaling back. Monitoring activities include not only the air monitoring but the physical presence of agency personnel. DEQ is cutting half of their presence, only one person each week day. LDNR is only going to have somebody there 2 days a week. The berm design and plans is proceeding. DEQ is taking the lead but they don't know who (TX Brine or DEQ) will do the actual design. And TX Brine is still fighting the deep observation wells.
